## Description

---

Truly, the only way out is within. As we face our self we begin to spiral upward. We actually blossom and grow rising toward the light. Who we are is love and, as we open, we see that we're a blend of male and female thinking. Through a marriage of the logical and intuitive, right brain and left-brain, peace and balance emerge. This is the feeling of being at peace and at one with all creation. This image originally appeared in the 1993 Calendar and again in the 2006 Calendar.
